Model 150 Laser Tracker

The Model 150 Laser Tracker can track up to 4 different lasers from various sources and report out the X, Y coordinates and distance from the tracker to the laser. The combination of 2 Model 150 Laser Trackers can identify object position in 3D space.

Technical Specifications		
Construction		
	Size	3.6" x 3.6" x 10"
	Weight	4.5 lbs.
	Enclosure	NEMA rated extruded aluminum, completely enclosed, lens exposed
	Processor	Motorola 68332
	Mounting	Various standard brackets
Connections		
	Serial	DB9 for RS232
	Power	85 – 240 VAC, 47 – 63 Hz, 18 – 36 VDC
	Video	Video A - BNC connectors for vision system output, Video B - BNC connectors for camera output
Operations		
	Speed	Track and identify up to 4 different lasers simultaneously at up to 60 Hz
	Operating Environment	32 - 125 Degrees F
